PROFESSIONAL PROFILE

Coming from a background in government with a focus in homeland security, the desire to help build and design websites and applications to help new business owners or those who have just started up to give them the foundations that they need for success

PERSONAL PROJECTS

On They Fly (in progress)

Tech: ReactJS, Firebase

Currently developing a tool for new or current restaurant owners to keep track of reservations, bar inventory, as well as kitchen inventory

Teacher's Pet

Tech: Ruby on Rails, PostgreSQL, Javascript

A dynamic web app teachers can use to keep track of students as well as keep better communication with parents. Teachers can store grades and attendance overtime and send generated reports to parents with a click.

Straight To The Pint

Tech: Ruby on Rails, Javascript

Established a blog within the hospitality industry to give craft beer connoisseurs an outlet to write about their experiences with different breweries and restaurants.

EXPERIENCE

Eataly FIDI

Bartender 2016-2017
